DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 29 is rejected under 35 U.S.C. 102(e) as being anticipated by Neumann (US Patent 6,752,832). Neumann disclose an apparatus for installing an implant assembly having an axle (19), gears (21), and an engager that is separate from the gears (Fig.5) that has cog-shaped projections (9) that are designed to fit into slots (8) that rotate the implant assembly (Fig. 2) and allow for the tubular body to rotate.

Neumann also has a handle section (30) at the end of the axle and also an outer casing (24). The axle extends partially through the handle.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 23-24 and 27-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neumann '832 in view of Zacouto (US Patent 6,692,495). Neumann

Application/Control Number: 10/663,554 Page 3

Art Unit: 3733

discloses the claimed apparatus except for specifically a first and second gear where the first and second gear engage one another about axes that are perpendicular to each other. Zacouto discloses two gears that are perpendicular to one another (Figs. 3 and 4). This can provide an advantage of a less invasive procedure and having less of an angle to have to move through. See Col. 6, lines 1-25). It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of Neumann having at least a first and second gear engaging one another at perpendicular axes in view of Zacuoto to have improved access to the spine and have a less invasive procedure from less manipulation.

Claims 1-8 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neumann '832 in view of Mauldin (US Patent 5,732,992). Neumann discloses the claimed invention except for moveable arc portions with substantially smooth surfaces. Mauldin discloses moveable arc portions (4/8) that have substantially smooth surfaces (on the inward facing sides). These moveable portions are designed for grabbing a prosthesis that is useable for insertion. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct The device of Neumann having at least moveable arc portions with smooth surfaces in view of Mauldin to have improved accessibility and control over prosthesis insertion.

Finality

The finality of the previous action dated 1/24/2008 has been withdrawn.

Application/Control Number: 10/663,554 Page 4

Art Unit: 3733

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES L. SWIGER whose telephone number is (571)272-5557. The examiner can normally be reached on Monday through Friday, 9:00am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
